- Easy website integration
- Room types and products
- Rates & availabilities directly from your PMS
- Corporate rates, promotion rate codes
- Arrangements and vacation packages
- Dynamic rates (Yield Management)
- Guest communication
- View reservations
- Reporting
- Integrated part of the Cultuzz Product Suite

**General Information**

We offer two versions of CultBooking. Depending on your requirements please click on the link beside the image to find out more.

**1. CultBooking Centralized Version**

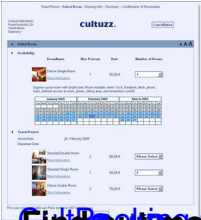

This version offers you a standardized version in a given design. A customization of colour and fonts can be offered as a service. The application is running on our Cultuzz servers. Dynamic data (availabilities and rates) can be maintained in your Property Management System (PMS), in your Destination Management System (DMS), in [CultDesk](#) or in the Cultuzz Service Interface (CSI).

[CultBooking Centralized Version](#)

**2. CultBooking Open Source**

We offer our booking engine also as a Open Source product. The product has all features of our centralised version but it is running on your own server. It is a license and charge free product, completely customizable in function and design.
